## Legal League Consulting announces a Strategic Alliance with Flowace, a very unique time management tool which records time automatically.

---

With the present challenges we need to re-think the way we work. The **Work from Home** (WFH) option is the new norm with social distancing. Emerging technologies have added significant value to the functioning of the legal industry by way of decreasing costs and time expended in tasks that can be automated. Now technology is also ensuring a seamless WFH support. Since our inception in 2010, we have continuously progressed towards our vision to take care of our client's needs. **Bithika Anand, Founder & CEO of Legal League Consulting**, continues to reinforce her promise to help firms grow and navigate them through this crisis.

To ensure a smooth transition of our clients to a WFH environment, we are proud to announce a Strategic Alliance with 'Flowace'.

Flowace is a user friendly application well suited for lawyers and all other professionals. Time is the currency of modern business. Managing and monitoring time while WFH is a challenge for most of our clients. This application facilitates the recording of time with minimum headaches and confusion. Like your virtual assistant, it will help you analyse the breakup of the most valuable resource you have - TIME. This

time-tracking and billing management platform summarizes the duration a user has spent on different work activities. Flowace automatically categorizes the time you spent working on different clients and projects. Flowace is the perfect tool to simplify life for you and your team members to WFH.

Their growing list of clients includes Anarock, Tax Law Chambers (TLC Legal), Jayanth Pattanshetti & Associates (JPA), Dhaval Vussonji Associates and Discern Living.

We feel our clients, be it lawyers or other professionals, all will benefit from the transparency, quick turnaround time and easier time recording by harnessing this tool. This will be the effective tool for firms to deal with the WFH Policy due to lockdown.

We are keen to take you through this technology and how it can be leveraged to manage your time recording seamlessly on a day to day basis. Feel free to get in touch with us at the coordinates mentioned below.

We look forward to connecting with you.
